

## GETTING STARTED WITH DRONESENSE:

# Using the Flight Control App

### Logging in to the Flight App

1. Open the DroneSense app on your device.
2. Log in using your organization ID, email and password, and MFA code if your organization uses multi-factor authentication.
3. Enter your PIN.

### Selecting the Mission

1. After you log in to the DroneSense flight control app, you will be prompted to choose a mission to join. Available missions are listed on the left.
2. Tap a mission to view its details, and tap **Join Mission** to join.
3. If the mission you need is not available, tap the **+** button to choose to either create a new mission or join another mission using a code sent to you.
4. If you don't want to join a mission, tap **Fly Offline**. Note that when flying offline, your feeds will not appear in the Operations Hub for incident command and other remote viewers.
